

The Operating System for Value-Based Care

16 integrated products powering clinical operations, population health, medical economics, and compliance — from a single AI-native platform.

The Problem: Value-Based Care Is Growing — Execution Is Broken

"Without appropriate data analytics, you don't have a value-based care company. Value-based care depends on data — clean data, accurate data, and real-time data available within minutes."

Fragmented Systems & Siloed Data

Providers struggle with operating across disconnected systems and disparate data sources.

Analytics Fail to Drive Action

Current analytics tools provide reports but do not translate into actionable insights or behavioral changes.

Missed Risk Adjustment & Quality Opportunities

Opportunities to optimize risk adjustments and improve quality metrics are frequently overlooked.

Increasing Administrative Burden

The administrative workload continues to grow, impacting efficiency and resources.

Market Timing: The Macro Shift

Structural and Inevitable

Expansion of Managed Care

Medicare Advantage enrollment has surpassed 33 million lives. Medicaid managed care now covers over 70% of beneficiaries. This structural shift creates massive demand for operational platforms.

Regulatory Pressure

CMS quality programs, HEDIS reporting mandates, and state-level accountability standards are tightening. Regulators and payers demand measurable outcomes with financial penalties for non-compliance.

Provider Risk Contracts

Healthcare providers are assuming full financial risk tied to patient outcomes. Capitated and shared-savings models now represent over \$1 trillion in annual healthcare spending.

Demand for Operational Intelligence

Legacy reporting tells you what happened last quarter. Providers need real-time, actionable intelligence that drives decisions at the point of care — not retrospective dashboards.

Billions in value-based contracts hinge on operationalizing data for real-time decisions. Successful execution will lead to market share consolidation.

Financial Performance Happens in Workflow, Not Dashboards

The Missing Layer in Healthcare Technology is Execution Infrastructure

Real-time Action

Surface the right intervention at the right moment. KOSIQ delivers clinical and financial alerts directly into provider workflows — flagging high-risk patients, missed quality gaps, and cost optimization opportunities before they become write-offs.

Alignment

Bridge the gap between clinical and financial decision-making. When a physician sees a patient, they see both the clinical picture and the financial implications — risk scores, care gaps, utilization patterns — unified in a single view.

Behavior Change

Technology alone doesn't improve outcomes — workflow design does. KOSIQ embeds intelligence into daily routines, nudging behavior changes that compound into millions in savings and measurably better patient outcomes.

Existing solutions are heavily focused on analytics. True value-based success requires integrated workflow design and execution infrastructure.

What is KosIQ?

KosIQ is an AI-native platform with 16 integrated products designed to operationalize value-based care. CoreIQ EMR serves as the clinical backbone, while Patient 360 provides a unified cross-product view of every patient. It serves as the operating system for integrated healthcare delivery by:

- Combining clinical and claims data in real-time — ingesting data from EHRs, payers, labs, and pharmacies into a single unified view
- Delivering actionable insights directly into provider workflows — not in a separate dashboard, but embedded where decisions are made
- Aligning population health, medical economics, and care delivery — connecting clinical quality with financial performance in every workflow
- Identifying high-risk patients before costly events — predictive models flag members likely to incur avoidable ER visits, readmissions, or gaps in care
- Automating quality reporting and compliance — HEDIS, risk adjustment, and regulatory submissions generated continuously, not quarterly

Executive Summary

KosIQ: Provider-Centric Platform for Risk-Bearing Organizations

EHR-agnostic Bi-directional Integration
Seamless data flow between eCW, Epic, Cerner, athenahealth, and other EHR systems via FHIR/HL7. No vendor lock-in.

Multi-Payer, Multi-Line-of-Business Support
Single platform for Medicare Advantage, Medicaid, ACA, and commercial lines. Manage all payer contracts in one view.

Real-time Actionable Analytics
Predictive and prescriptive analytics that surface interventions at the point of care — not reports reviewed weeks later.

NCQA DAV-Aligned Quality Intelligence
Quality metrics aligned with NCQA Data Aggregation and Validation standards. Continuous HEDIS gap closure tracking.

Health Equity and SDOH Integration
Incorporates social determinants of health, ZIP-code level risk factors, and health equity metrics for holistic population management.

Operational Alignment for VBC Programs
Workflow-native tools that align clinical, financial, and administrative teams around shared VBC goals and KPIs.

Data becomes execution — not just reporting.

The KOSIQ Platform

16 Integrated Products — One Unified Operating System

AtlasIQ

Population health command center

Risk Engine

HCC risk scoring & RAF optimization

RPM

Remote patient monitoring & alerts

FraudIQ

Fraud/waste/abuse detection

ClinIQ

Clinical intelligence & decision trees

Quality

HEDIS measures & Star Ratings

Behavioral Health

Mental health screening & SDOH

ClaimIQ

Claims processing & denial mgmt

CoreIQ

Full EMR: scheduling, encounters, e-Rx, labs, billing

Care Management

Care plans & chronic disease mgmt

Payer Analytics

Real-time payer data & contract perf

AuthIQ

Prior auth automation & CMS compliance

ChartIQ

AI-powered chart summarization

Cost Explorer

Medical economics & utilization review

BridgelQ

Interoperability hub (FHIR/HL7)

ComplianceIQ

HIPAA compliance & risk assessment

Every product shares one database, one login, one patient record. Clients pick what they need — bundle or à la carte.

AI-Native Architecture • Patient 360 Cross-Product View • 199 Clinical Note Templates
Claude AI chat assistant on every page • AI clinical decision trees • Predictive + prescriptive analytics • CoreIQ EMR as clinical backbone

Why KosiQ Wins: 5 Structural Advantages

Modular Add-On Model

Clients pick exactly the products they need. Start with one, expand to sixteen. Bundle pricing rewards platform adoption — no bloatware, no shelfware.

Full EMR Built In

CoreIQ replaces legacy EMRs with 199 clinical templates, patient flow tracking, document management, and integrated prescribing. No separate EMR needed.

Patient 360 View

Every patient's complete story across all 16 products on one screen. Claims, prescriptions, labs, risk scores, care plans — unified.

AI-Native Architecture

Claude AI assistant on every page. AI clinical decision trees. Predictive and prescriptive analytics built into every workflow — not bolted on.

ChartIQ: The Trojan Horse

AI chart summarization is the easy entry point into hospitals. Once inside, cross-sell the full 16-product platform. Low friction adoption, massive expansion potential.

16 products. One platform. Every workflow covered.

Platform Architecture

How 16 Products Become One Platform

Single Sign-On

One login for all 16 products

Product Switcher

Navigate between modules instantly

Org-Level Control

Admins configure per-org access

Patient Drill-Down

Every metric links to patient list

Economic Flywheel

A Virtuous Growth Loop

Each cycle amplifies platform dependency and defensibility, creating a virtuous growth engine.

High-Margin Enterprise SaaS Business Model

How Revenue Works

PMPM pricing × members = predictable recurring revenue. Integration fees provide upfront cash.

EXAMPLE: ONE CLIENT — 30,000 MEMBER MANAGED CARE GROUP

PMPM Rate: \$1.25 × 30,000 members × 12 months = **\$450,000/yr**

Integration Fee (one-time): = **\$15,000**

Year 1 Revenue from ONE client: **\$465,000**

3 clients at this size = \$1.4M ARR. 8 clients = \$3.7M ARR.

PMPM Pricing Tiers

Core Analytics	\$0.50
Advanced + Predictions	\$1.25
Enterprise + Custom	\$2.24

Integration Packages

Standard EHR	\$10K
Complex Multi-System	\$15K
Enterprise Custom	\$20K

Revenue Mix (Year 1)

Recurring SaaS revenue scales with lives under management

Projected Annual Recurring Revenue

All projections intentionally conservative — assumes slow ramp, modest deal sizes, zero viral/referral growth.

Unit Economics

Per-member economics that improve at scale

Customer Acquisition Cost \$18K Per organization (avg 15K members)	CAC per Member \$1.20 Drops to \$0.40 at scale	LTV per Member \$42.00 36-month avg contract
LTV:CAC Ratio 35:1 Target: >10:1 for SaaS	Payback Period 4.2 mo Integration fee covers CAC	Gross Margin 88% Software + AI infrastructure

Margin Structure

88% gross margins are best-in-class for healthcare SaaS. No hardware, no physical infrastructure, no per-claim processing costs.

5-Year Financial Projections

Conservative base case — no viral growth, modest contract sizes

ASSUMPTIONS: Avg client = 15K-30K members Avg PMPM declines with scale (\$1.25!\$0.75) 3 clients Year 1 ! 42 clients Year 5 36-month avg contract 12% COGS No churn assumed					
	Year 1	Year 2	Year 3	Year 4	Year 5
Members Under Management	8,000	28,000	65,000	120,000	200,000
Client Organizations	3	8	16	28	42
Avg PMPM	\$1.25	\$1.15	\$1.00	\$0.85	\$0.75
PMPM Revenue	\$120K	\$387K	\$780K	\$1.22M	\$1.80M
Integration Revenue	\$45K	\$100K	\$200K	\$300K	\$400K
Total ARR	\$1.74M	\$7.08M	\$18.6M	\$38.4M	\$62M
COGS (12%)	\$209K	\$850K	\$2.2M	\$4.6M	\$7.4M
Gross Profit	\$1.53M	\$6.23M	\$16.4M	\$33.8M	\$54.6M
Gross Margin	88%	88%	88%	88%	88%
Sales & Marketing	\$480K	\$1.2M	\$3.0M	\$5.8M	\$8.5M
R&D	\$600K	\$1.1M	\$2.5M	\$4.8M	\$7.2M

Total Addressable Market

KOSIQ operates across multiple \$30B+ healthcare markets simultaneously

Markets KOSIQ Addresses

Market	Size (2026)	Growth	Source
EMR/EHR Systems	\$36.2B	6.3% CAGR	Straits Research 2026
Revenue Cycle Mgmt	\$73.0B	12.4% CAGR	MarketsAndMarkets 2026
Population Health	\$35.8B	17.2% CAGR	Grand View Research 2026
Healthcare Analytics	\$21.4B	23.5% CAGR	GlobeNewsWire 2026
Claims Processing	\$18.2B	8.1% CAGR	Fortune Business 2026
VBC Enablement	\$15.4B	14.8% CAGR	KLAS Research 2025
Risk Adjustment / HCC	\$8.6B	19.3% CAGR	Chilmark Research 2025
Quality / HEDIS	\$5.2B	11.2% CAGR	Gartner 2025

Combined TAM \$213.8B

WHY \$234B AND NOT \$53B:

eClinicalWorks alone generates \$700M+/yr from EMR + RCM. Epic is worth \$50B+. KOSIQ replaces 8 separate vendor categories with one platform. The TAM is every dollar spent on fragmented healthcare operations software.

5.2M

Medicare Advantage enrollees in Florida — the largest MA market in the US. KOSIQ starts here, then expands nationally.

Market Opportunity

Leveraging Key Healthcare Trends

Population Health Management
Proactively managing health outcomes for defined patient groups.

Medical Economics Optimization
Enhancing financial performance through efficient resource allocation.

Value-Based Care Enablement
Facilitating the shift to outcomes-based reimbursement models.

Target Addressable Market
Includes MSOs, ACOs, Risk-bearing Provider Groups, Integrated Health Systems, and Health Plans.

VBC Market Growth

This convergence presents a multi-billion dollar infrastructure opportunity for innovative solutions like KosiQ.

Competitive Positioning

Traditional Solutions vs. KosiQ

Traditional Solutions

- Analytics dashboards
- Care management tools
- Point solutions

KosiQ: Value-Based Care OS

- Execution infrastructure
- Workflow integration
- Unified performance across domains

Our Founders

Driving Innovation in Value-Based Care

Jose David Suarez, MD
Founder

- Chief Medical Officer of a value-based healthcare organization
- 25+ years of managed care leadership
- Academic medicine & research leadership
- Former President, Dade County Medical Association

Experience: Witnessed firsthand the critical need for clean, actionable data to improve financial outcomes.

Belief: Clean, actionable analytics are fundamental to success in value-based care.

David Suarez
Co-Founder & Chief Product Officer

- Technology entrepreneur
- AI-powered SaaS platform architect
- Expertise in automation, infrastructure, and scalable software systems
- Leads development of a real-time, intelligent platform to transform data into operational execution

Why This Team Wins

A Rare Combination of Expertise

Clinical Leadership

Deeply embedded in Value-Based Care (VBC) execution, ensuring practical and impactful strategies.

Operational Experience

Proven ability to manage risk in real-world healthcare settings.

Advanced Technology

Cutting-edge AI and SaaS engineering capabilities driving innovation.

Built by operators, for operators. This team has faced these challenges firsthand, developing solutions based on practical experience rather than theoretical concepts.

Strategic Comparables

How investors understand this space

Oak Street Health	agilon health	Evolent	Privia
Care model execution Acquired by CVS Health for \$10.6B. Built a vertically integrated primary care platform for Medicare patients. Proved that execution-layer VBC companies command premium valuations.	Physician enablement under risk IPO valued at \$10B+. Enables physician groups to enter full-risk Medicare Advantage contracts. Revenue tripled in 2 years.	Value-based infrastructure Market cap ~\$3B+. Provides technology and services to health systems transitioning to VBC. Validates that infrastructure plays win long-term.	Provider alignment platforms IPO, revenue \$1.6B+. Physician practice management platform optimizing performance under value-based contracts across 4,000+ providers.

KosIQ sits at the intersection of these proven models — combining clinical execution with financial intelligence infrastructure.

Long-Term Vision

KosIQ: The Default Operating Infrastructure for Value-Based Healthcare Organizations

Embedded Integration

Seamlessly integrated across all clinical workflows. KOSIQ becomes the invisible operating layer that powers every patient interaction, quality review, and financial decision.

Scalability

Managing millions of covered lives across hundreds of provider organizations. Platform economics improve with each new customer — marginal cost per additional member approaches zero.

Financial Predictability

Driving predictable financial outcomes under risk-sharing arrangements. Organizations using KOSIQ can forecast revenue, costs, and quality metrics with confidence quarters in advance.

Strategic Defensibility

Creating high switching costs and a durable competitive moat. Once KOSIQ is embedded in workflows and connected to data sources, replacement becomes operationally unthinkable.

KOSIQ

**KosIQ is building the execution infrastructure
that turns value-based care into a scalable,
financially predictable operating model.**

The Ask

Raising: \$500K–\$1.5M Seed

Use of Funds

- Product development — engineering team, AI/ML pipeline, platform hardening
- Enterprise integrations — EHR connectors (Epic, eCW, Cerner, athena)
- Go-to-market expansion — sales team, pilot partnerships, conferences
- AI intelligence layer — predictive models, NLP for clinical notes, automation

Lean Option

\$500K – \$750K

- 12-month runway
- Core team (4-5 people)
- MVP !' Product-market fit
- 10-15 customers by Mo 12

Goals

- Scale to 15+ enterprise deployments within 12 months
- Expand covered lives under management to 100K+
- Achieve SOC 2 Type II + HIPAA certification
- Build repeatable sales motion with <90 day sales cycle

Sweet Spot

\$1M – \$1.5M

- 18-month runway
- Full team (7-8 people)
- Aggressive market capture
- 25+ customers, \$1.74M ARR

PRE-MONEY VALUATION

\$15–20M

Key Milestones

- ' First paying customer (Mo 4)
- ' 3 EHR integrations live (Mo 10)
- ' SOC 2 + HIPAA certified (Mo 10)
- ' 15+ customers / \$1M+ ARR (Mo 12)
- ' Series A ready (Mo 12-18)
