What KOSIQ Includes That Legacy Platforms Don't

- ' AI Predictive Analytics — hospitalization, ER, cost, and readmission risk models
- ' AI Prescriptive Recommendations — patient-level interventions with projected ROI
- ' ClinIQ AI Decision Trees — conversational AI for custom population analysis
- ' ChartIQ Integration — AI chart summarization for clinical shift handoffs
- ' BridgeIQ — native FHIR R4 interoperability hub, not bolted on after the fact
- ' Modern Apple-Inspired UI — clean, intuitive design vs legacy 2005 interfaces
- ' Implementation included on most modules — no surprise \$1,000/day fees
- ' Flexible terms available — no mandatory 36-month lock-in contracts required
- ' Single vendor for 11 products — one login, one contract, one support team
- ' AI Chat Assistant built into every screen for instant clinical insights

Why Practices Switch to KOSIQ

- ' Lower cost: 10-20% savings across every module vs legacy platforms
- ' Better technology: AI-native architecture vs retrofitted legacy systems
- ' Faster deployment: most modules live in weeks, not months
- ' Modern interoperability: FHIR R4 native vs HL7-only legacy connectors
- ' One platform: consolidate 5-8 vendor contracts into one relationship
- ' Healthcare founders: built by a CMO and CPO who live value-based care
